Hostel floors lose the network.

Dead zones

Hostel floors often have dead zones, or no usable network.

Power cuts

During a power cut, phones cannot help the floor coordinate.

The tower

WhatsApp needs the tower. The floor does not always have it.

A floor board with no internet.

Android app

A local Offer / Ask / Note board on your floor. It works with no internet.

Nearby phones

Phones on the same floor can share posts over Bluetooth when the app is open.

Blackout mode

A full black screen with a timer, and I'm OK / Need help.

Setup, board, blackout, nearby sync.

Setup

Name, room, floor.

Floor board

Board with filters.

Claim

Claim posts.

History

History of posts.

Settings

Settings.

Blackout mode

Full black screen with a timer and I'm OK / Need help.

Bluetooth nearby sync

Same floor, when the app is open.

Offline alone

Fully usable offline alone.

What it is built with.

App

Kotlin. Jetpack Compose. Material 3.

Local store

Room. DataStore.

Nearby

BLE advertise / scan + GATT sync.

Build

GitHub Actions debug APK.

After the first floor.

Mesh

Stronger multi-hop mesh.

Peers

Better peer UX.

Background

Background limits / battery.

iOS

iOS if ever needed.

Hop

Your floor, offline.
